presents

Surface Coating Operations: Metal Parts and Products

Course No. 230

This one day course presents an overview of the industrial coatings industry. It introduces the variety of resin chemistries in use, the principal application technologies and their respective transfer efficiencies. We will also discuss the regulatory approaches available the calculation of excess emissions and the rules adopted throughout the state. Finally we will discuss the air inspection and documenting compliance with district rules.

July 14, 2004

8:30 AM - 5:00 PM

Location TBA

Sacramento, CA

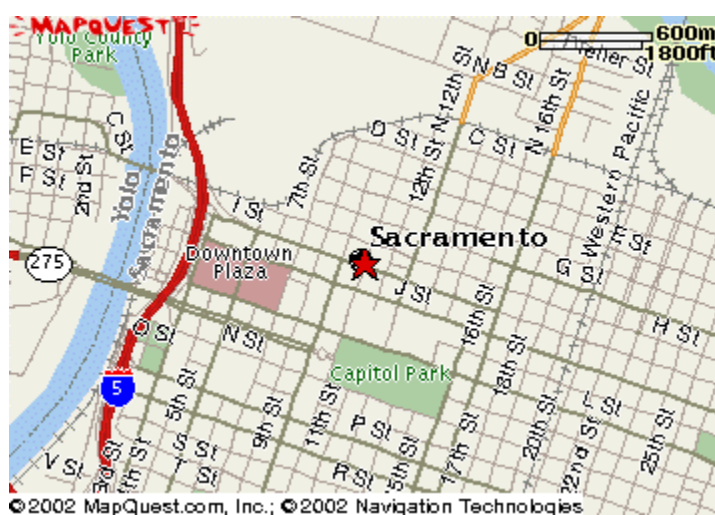

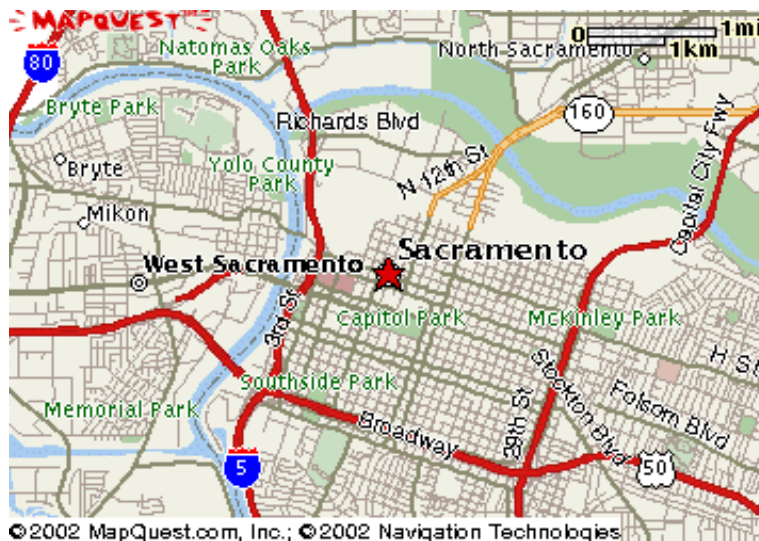

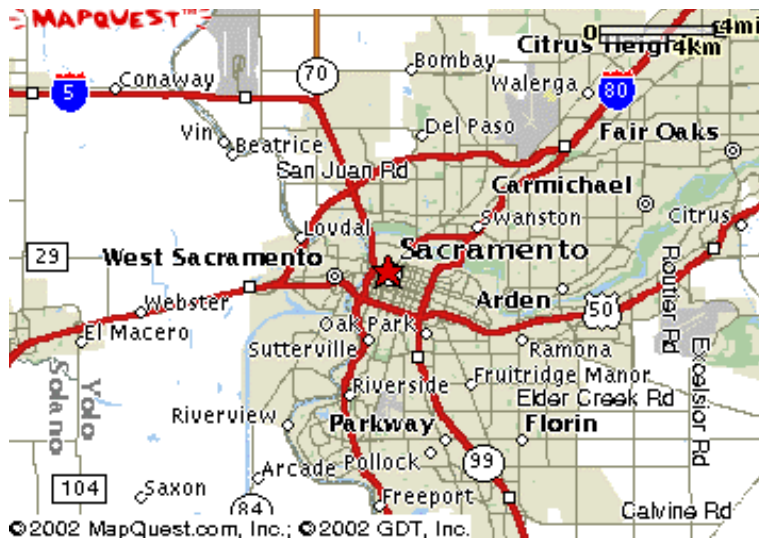

Each class includes an afternoon field visit. Field visit and exam are mandatory to obtain a certificate of completion. **Appropriate safety gear including steel toed shoes, ear & eye protection may be required.** An enrollment fee will apply.
